

Task Management Software & SMS

Task Management Software

I would like to thank the many respondents to our request for information regarding our task management software. Very soon we hope to introduce the replacement package across HGFA for use not just by the committee, but for tasks by the Office staff, Operations, Competitions committee, Safety & Ops committee and other teams working to improve our sports.

Thanks again

Mark Pike

HGFA / VHPA Committee member

THE HGFA SMS

In the last issue of Airwaves there was a brief mention of the new Safety Management System (SMS).

The SMS helps to comply with our Deed of Agreement with CASA, but more importantly, if done properly the SMS will enable us to improve how we promote safety in the HGFA.

It will not create more red tape, it will not create a whole lot of new rules people have to comply with. If that happens we will have failed. It will however provide the means for us (HGFA CoM and Operational Staff) to measure how we are doing and be accountable for our commitments.

It will also provide a system to improve how we learn from experience and share the knowledge.

We recognise that there is probably room for improvement, and we have a wide variety of expertise within our membership. So if you have experience in the development or implementation of safety management systems we'd love to hear your suggestions. Even if you have no such experience, but feel you have something constructive to offer, your contribution will be welcome.

We expect the SMS to evolve and improve over time, this is just a first step in a long process.

Until next time, safe, fun flying

- Brett Coupland, General & Operations Manager, HGFA
